

Giant Jenga Rules

Setup:

1. Using 54 blocks make an 18 story tower, with 3 blocks per story; each story being perpendicular to the stories above and below it.

Rules:

1. Remove one block from any row below the highest completed story and stack the block on top perpendicular to the story below. (Some play only removing blocks below the top three stories)

2. Remove and stack one block per turn (Using only one hand at a time)

3. You are allowed to tap blocks to find a loose one for removal, but if you move one that you don't intend to remove, you must put it back before removing another.

4. Always complete each story with 3 blocks, before starting a new story.

5. Your turn lasts 10 seconds after you place your block on top of the tower or when the next player touches the tower.

Winning:

1. Keep taking turns until someone topples the tower. The last player to stack a block without toppling the tower wins!

Be careful...

A tower built of 2x4's can hurt if it lands on you, especially when wearing open toe shoes.
