

Mega Connect 4 Rules

Set Up

You will need to separate the colored discs into the two colors. Once you have separated the discs, you will be ready to play.

Note: Make sure you have blocked the bottom of the frame so that the pieces do not drop out the bottom when you drop them in.

Object of the Game

The objective of the game is to get four of your color discs in a line. This line could be either diagonal, horizontal or vertical. During the game you take it in turns to drop the counters into the frame. You must always take a turn and cannot 'pass' or forfeit your turn.

The first person to get 4 in a row is the winner.

Win, Lose or Draw

It is seen as losing or forfeiting the game to your opponent if you get more than 4 in a row. This could be done if you have no choice but to drop a counter into a space which is between your own color counters making a row of 5 or more.

It is possible to draw - this happens when you fill up the board completely but no one has achieved four in a line.
